

## **Message for 1<sup>st</sup> World Parliament on Spirituality 2012**

For the first time, as a generation, we have the necessary resource, capability and technology to address and solve every problem on the planet, but still, an inclusive consciousness is missing. Because human beings are so hugely empowered, their consciousness has become far more important than ever before. If their consciousness is not inclusive in nature, just one man can destroy the world.

In the name of religious, national and other identities, we have fragmented humanity into many pieces, to breed much hatred, anger, and prejudice. If a fundamental sense of inclusiveness and basic integrity does not grow into the population, keeping it as one people is going to be a great effort.

The fundamental of spiritual process is inclusiveness. If we do not invest sufficient time, energy, and manpower to raise human consciousness, we are going to pay a huge price. This investment is no longer a luxury that a few people can dabble with; the very survival of the planet is depending on it.

There are people who believe the world is going to end because of a fanciful date. So, let us end it the way we have known it. What has marked the history of humanity most have been wars and battles, famines and misery. Let us create a world where we can mark our lives with the most beautiful things, which will be remembered in future.

Let us make the ugliness in this world end, and make a new, blissful and loving world. For a shift in consciousness, we do not need galactic help; it is in our hands. If human beings are willing, we can create a new world – a world that is inclusive.

Let us make it happen.

Love and Blessings,

Sadhguru
